MOVE CONTROL

Premium Drive!

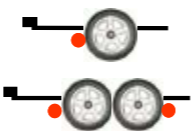

The Innovative

The innovative „COMPACT“ model combines the unique features of the MOVECONTROL with very small dimensions, an extremely low height and a very low weight. With its very wide large diameter rolls and a powerful drive motor the system nevertheless is a lot of fun when manoeuvring your caravan.

The remote safely controls all functions such as on/off, docking/undocking, automatic, engaging/disengaging, and of course the manoeuvring procedures. The COMPACT weighs only about 25 kg and may also be used universally for small caravans and caravans with a reduced ground clearance.

- soft start and soft stop
- engaging/disengaging by remote
- total caravan weight: up to 2,000 kg (single axle)
- TÜV approval

▸ mounting options

The Tried and True

Simply mount the system to the chassis of your caravan and manoeuvre your caravan with the push of a button safely across the campground, into the winter quarters, for loading purposes on your own drive, or simply hitching the caravan to your trailer coupling. Going over curbs and manoeuvring on rough grounds or steep inclines up to 25% is a piece of cake with the MOVECONTROL.

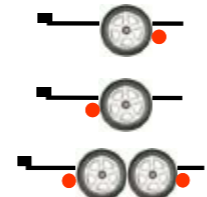

Wide driving rolls with patented surface guarantee maximum traction, even on steep hillsides. Unique: the motors are located inside the chassis and not in the spray range of the wheels.

MOVECONTROL TWIN 4WD is the powerful all wheel drive for caravans with twin axle. The patented control may even manoeuvre big caravans on a rather small space. 2,000 kg with a 15% gradient are no problem at all. By soft start and soft stop accurate manoeuvring operations can be performed within millimeter range.

The optional MOTORDRIVE is used to engage/disengage the rollers by remote.

- cross actuation operation
- soft start and soft stop
- engaging/disengaging by remote (optional)
- total caravan weight: up to 2,000 kg (single axle)
- TÜV approval

▸ mounting options

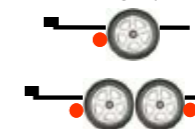

The Price-Conscious Model

The RK Mover also offers all major features of the Reich MOVECONTROL series – however at a very favourable price. Smooth manoeuvring and jerk-free startup on almost every ground and under any possible weather condition will be no problem at all. As on all MOVECONTROL drives the control safely stops the trailer, even on steep hillsides.

- soft start and soft stop
- total caravan weight: up to 2,000 kg (single axle)
- TÜV approval

▸ mounting options

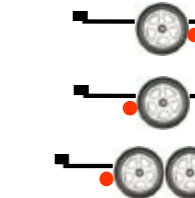

The Hot Tip

The MOVECONTROL ECONOMY is the low-priced start-up model without abandoning the familiar Reich quality. The system features very wide driving rolls made of aluminium which may be engaged or disengaged manually by the cross actuation bar. The powerful drive may be used to manoeuvre single-axle trailers up to a weight of 2,000 kg, while at the same time overcoming steep inclines up to 25% at a weight of 1,200 kg.

- cross actuation
- soft start and soft stop
- total caravan weight: up to 2,000 kg (single axle)
- TÜV approval

▸ mounting options

REICH offers the most comprehensive production program for all purposes

- in front of the axle
- behind the axle
- on twin axles with real all wheel drive
