

RK MOVER

GOOD VALUE

RK Mover is the moving device for price-conscious users. Well-proven technique, as well as simple and safe functioning at an uncompromising favourable price.

A completely perfect solution to move your caravan or trailer at the push of a button.

RK Mover provides Alu-friction rollers with a unique, patented, wear and abrasion resistant surface for the best traction - even under the worst conditions.

Simple and easy engaging or disengaging the friction rollers by a control lever.

SOFTSTART and SOFTSTOP electronics facilitate precise movement and greater control on any ground or weather condition - millimetre by millimetre.

The electronic will stop your caravan safely, even on a slope.

Hitching your caravan was never so easy.

Easy installation and operation.

Are you looking for a comfort moving device with even more operating convenience and inboard motors, which are not in the spray of the tyres ?

Then our comfort moving device MoveControl is exactly the right thing for you.

ISO-TÜV 9001:2000 certification

The twin-axle version is designed with 4-wheel drive for maximum performance and added security. The RK Twin Mover clears curbs and traverses pot holes easily. It also manoeuvres your caravan into confined spaces or on the most difficult terrain - even if a tyre loses contact with the ground.

All parts are zinc-plated for complete corrosion-resistance.

From a loose gravel pitch to a steep grassy slope, RK Mover enables your caravan to ascend gradients of up to 25% (for RK Mover - based on a caravan weight of 1,200 kg) or 15% (RK Twin Mover - based on a caravan weight of 2,000 kg) - no problem.

The maintenance-free RK Mover - for your caravaners-life - free from worries.

Please also ask for our Move Control moving device.

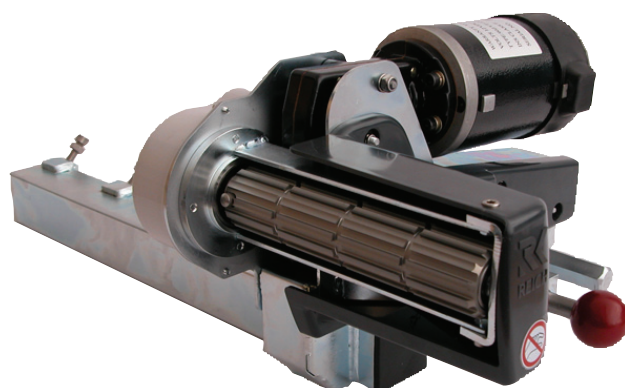

RK Mover Art.-No.: 527-0530

Moving device for single axle caravans until 2,000 kg. Simple and easy engaging and disengaging the friction rollers by a control lever.
