powrtouch FREEDOM

Our original caravan mover - evolved

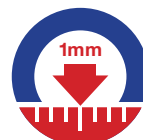

The **powrtouch FREEDOM** is an evolution of our original caravan mover. It's designed to make moving your caravan precisely where you need an absolute breeze. Designed and developed in the UK, the system makes extensive use of lightweight alloy materials.

Just some of the **FREEDOM** features...

- The Original Powrtouch Freedom mover system is **competitively priced** and designed and manufactured to the highest standards.
- **Powrbar cross actuation system** that allows BOTH rollers to be engaged or disengaged from EITHER side of the caravan.
- Designed for **maximum ground clearance**.
- Fluid movement control giving the ability to change direction without stopping.
- Full soft start system giving **MILLIMETRE by MILLIMETRE control**.
- **Full DIY instructions** available.
- **Low battery indication system** (for both the handset and caravan battery).
- **Automatic shutdown** after 20 minutes to prevent accidental battery drain if the Powrtouch is left switched on.
- **Instant stop** the moment the handset buttons are released (for maximum safety).
- **National coverage of technicians** to call upon anywhere in the UK should you encounter any issue with performance of your mover. At home or on holiday, Powrtouch remain the brand you can truly rely on.

Positional accuracy to a millimetre

360° fluid precision control

Tested for over 1.5 tons on a 1:4 slope

8-Way Directional Control
